ABSTRACT

This study of foreign language enrollments in public secondary schools, the thirteenth in a series, focuses primarily on enrollments in Fall 1978, but it also presents comparative data from earlier reports. The report is based on a questionnaire survey directed in fall 1979 and spring 1980 to all state foreign language supervisors. In the 20 states where the data were not available, questionnaires were sent directly to various school districts selected by a random sampling procedure. The report consists of an introductory summary of results, individual language tables listed by region and state, and summary tables comparing data from surveys conducted in 1974 and 1976. Survey of Foreign Language Enrollments in Public Secondary Schools, Fall 1978

American Council on the Teaching of Foreign Languages
2 Park Avenue, New York, New York 10016

Department of Education, Division of International Education,
Grant No. G00-79-01693

This report is based upon a questionnaire survey directed in fall 1979 and spring 1980 to all state foreign language supervisors. In the states where the data was not available, questionnaires were sent directly to various school districts selected by a random sampling procedure.

An analysis of the compiled figures for all 1978 indicated an enrollment of over 20 million students in the public secondary school (PSS) population for grades 7-12. Two years earlier, in 1976, 3.78 million foreign language enrollments were reported from the PSS population totaling more than 21 million students in grades 7-12.

The report consists of an introductory summary of results, individual language tables listed by region and state, and summary tables comparing data from surveys conducted in 1974 and 1976.

FOREIGN LANGUAGE OFFERINGS AND ENROLLMENTS
IN PUBLIC SECONDARY SCHOOLS, FALL 1978

This study of foreign language enrollments in public secondary schools is the thirteenth in a series. From 1958 to 1974, the survey had been prepared by the Modern Language Association. The past two surveys, in 1976 and in 1978, have been conducted by the American Council on the teaching of Foreign Languages. This report shows the impact on high school foreign language enrollments of the recent trend among many colleges and universities to eliminate prerequisite requirements in foreign languages. The present study focuses primarily on enrollments in fall 1978, but it also presents comparative data from earlier reports, particularly from 1974 and 1976.

In 1978, public secondary schools (PSS) enrolled over 20 million students in grades 7-12. From this population, 3.73 million students were studying a foreign language (FL), which represents 17.8 percent of the total PSS figure. Past studies reveal that in 1968, 4.75 million FL enrollments were reported from the PSS population of 18.4 million students; and in 1976, over 3.78 million FL enrollments were reported from a PSS population of 21 million students. Both the PSS population and FL enrollment decreased during the two year period from 1976 to 1978.

Distribution of the Foreign Language Enrollment

In fall 1978, the five leading modern foreign languages (MFLs)--Spanish, French, German, Italian, and Russian--accounted for 95.1 percent of the total language enrollments in grades 7-12; Latin for 4.4 percent; and "other languages," about two dozen total, for one-half of one percent.

Nationally, the FL enrollment as a percentage of PSS populations in grades 7-12 decreased from 19.2 in 1974 to 17.9 in 1976 to 17.8 in 1978. The downward trend of the late sixties, when the FL enrollment of 27.4 in 1965 fell to 27.1 in 1968, appears to have been arrested and the FL enrollments have stabilized.

Of the high school students (grades 9-12) of MFLs, over 53 percent were studying Spanish, with French in second place encompassing 28 percent of the the MFL enrollment. French enrollments indicated an increase from 1976 to 1978, a trend which foreign language educators have not seen in the last ten years. German, which experienced the largest decrease in enrollment from 1974 to 1976, was the language ranking in third place enrolling 11 percent of the 9-12 PSS population.

Latin enrollments indicated a slight increase in 1978, although it still comprises less than one percent of the PSS population in grades 7-12. The Russian enrollment decreased from 1976 to 1978 due to the elimination of entire Russian programs in several states. Italian, although it is offered only 11 states, increased the number of students enrolled in grades 7-12 by 3 percent.

Two dozen "other languages" are taught in secondary schools, all with limited enrollments. The total enrollment in "other languages" increased from 25,000 in 1974 to 27,599 in 1976. However, in 1978 the figures decreased to an enrollment of 19,172. Of the two dozen "other languages," Hebrew and Portuguese enrollment figures increased 19 and 28 percent respectively from statistics reported in 1976. The evaluation of comparative data from 1976 and 1978 indicated that the Japanese language classes enrolled 25 percent fewer students.

The summary table constitutes a capsule history of foreign language study in grades 9-12 in public high schools over the past 88 years. In 1890, one high school student in three was enrolled in Latin, and one in six was studying either French or German. By the turn of the century, the

proportion of high school students enrolled in Latin had risen to half, and in French or German, to a fifth. In 1910, Spanish appeared in the high school curriculum, with an enrollment of less than one percent of the population. As a result of World War I, there was a dramatic shift in the balance among the languages. French became the leading language, while German drastically declined in enrollment. In 1922, French enrolled 15.5 percent of the high school population, Spanish followed with 11.3 and German lagged behind with less than one percent of the population.

Foreign language study suffered a general decline during the 1930s and 1940s. By 1948, only one-fifth of the high school population was enrolled in any foreign language. Spanish had emerged as the leading modern language. with 8.2 percent of th enrollment. French, which had not yet recovered from the dramatic drop it suffered in World War II, had less than 5 percent of the population.

The period from 1958 to 1968 marked a steady increase in foreign language enrollment. However, since 1968, foreign language enrollments have been plagued by a steady decrease. The language requirement for admission to numerous colleges and universities began to disappear from many college catalogues. This resulted in a lack of interest by high school students as well as a lack of incentive to study a language.

Only a marginal difference in the percent of students enrolled in a foreign language, 17.9 to 17.8, should be noted for the period from 1976 to 1978. Several languages, including French, Italian, and Latin increased their enrollments since the last investigation. Spanish enrollments declined, yet the Spanish language still maintains the largest enrollment of any foreign language.

Special Explanations

Statistical tables for the individual languages are organized as follows: the numerals 3 through 8 designate the languages--Spanish, French, German, Russian, Italian, and Latin, in that order. The letters A-G designate the seven tables into which the data for each language are organized. The pattern is consistent in order to make comparisons between languages easy. For example, Table 3-A evaluates Spanish enrollments in grades 7-12 for each state and presents figures for the entire nation. Table 4-A provides the corresponding data for French, Table 5-A for German, and so forth. Table 9-A is devoted to enrollments in all "other languages" reported by each state.

A comparison of data from 1974, 1976, and 1978 appears on all B,C, and D tables. The B tables (3-B, 3-B, ...8-B) evaluate enrollments in grades 7-12 for those years, the C tables evaluate enrollments in grades 7-8, and D tables compare data for grades 9-12. The E tables provide state-by-state comparisons of foreign language, modern foreign language, and individual language enrollments and produce a national total.

The F tables compare foreign language, modern foreign language and individual language enrollments for grades 7-8, and G tables compare the same categories for grades 9-12 only.

Data Compilation

For this study, the foreign language supervisors of the following states returned complete statistical data for the entire state: Arkansas, Alabama, California, Connecticut, District of Columbia, Florida, Hawaii, Idaho, Kentucky, Louisiana, Missesota, Mississippi, Montana, New Hampshire, New Jersey, New York, North Carolina, Oklahoma, Pennsylvania, Texas, Vermont, Virginia, Wisconsin, and Wyoming. The enrollment statistics for grades 9-12 only were reported by the state foreign language supervisors in the following states: Indiana, Iowa, Missouri, South Carolina, Tennessee, Utah, and West Virginia.

In twenty states, state departments of education could not supply the statistical data for the year indicated and in the format required. In each of these states, a ten percent stratified, random sample of school districts was conducted.

The material gathered from the sample survey was extrapolated and used to make projections for the entire state. The following states participated in the random sample: Alaska, Arizona, Colorado, Delaware, Georgia, Illinois, Kansas, Maine, Maryland, Massachusetts, Michigan, Nebraska, Nevada, New Mexico, North Dakota, Ohio, Oregon, Rhode Island, South Dakota, and Washington.

The page entitled Footnotes for Table 2-A and Subsequent Tables documents this information and has been designed to aid the reader when using the statistical report. All references to the 1978 figures, noted by an asterisk (*), can be explained by using this page of footnotes. For example, an asterisk appearing on Table 3-B signifies that the reader must refer to Table 2-A and the set of footnotes on the opposite page.

A lower case letter represents footnotes for 1974; a Roman numeral refers to statistical data for 1976. All of these notations are explained at the conclusion of individual Tables B-D, the statistical charts with comparative data for 1974, 1976, and 1978.

Conclusion

The future directions of foreign language education must be evaluated in order to prevent the downward trend of language enrollments from reaching a level from which it cannot be revived. It is time to inform the public about the importance of foreign language instruction and to stress the relationship of language to business, to governmental affairs, and to the promotion of cultural understanding of our pluralistic society. The effect of Proposition 13 on the budget designated for the California public schools is evidence of the damage that can occur when the private citizens are unaware of the need for language education. California's language enrollments in 1978 decreased 14 percent from previously published data in 1976.

The language issue is an area of growing importance to the world of international business, commerce, and governmental affairs. However, it is of even greater importance that we recognize the vast majority of people living in the United States for whom English is not a native language. The circumstances both here and abroad strengthen the case of the need for foreign language education. We need to regard our cultural richness and ethnic diversity as two of our most admirable attributes and develop these resources to improve the language education and cultural understanding of our citizens.

1. All foreign language enrollments from 1890 through 1948 are estimated from percents of the languages in the total high school enrollments given by William R. Parker, The National Interest and Foreign Languages, U.S. National Commission for the United Nations Educational, Scientific, and Cultural Organization, 1957, pp. 52-53

2. The totals of the modern foreign languages (columns 5, 7, 9, 13) do not equal the MFL enrollment totals in column 3, since the column 3 figures include a small number of enrollments for "Other Languages." (See Table 9-A for a summary of "other Languages" enrollments, 1974)

3. The totals of the modern foreign languages do not equal the MFL enrollment totals. The column 3 figures include enrollments for "Other Languages" and unspecified languages. For further information, please see Footnotes for Table 2-A and Subsequent Tables.

1. The totals of the modern language figures and the "Other MFL's" do not equal the total Modern Foreign Language Enrollment due to the to number of "languages unspecified" reported by different states.

2. The figure includes enrollments for unspecified languages in California, Indiana, North Carolina, and Texas. For further explanation, the Footnotes for Table 2-A and Subsequent Tables.

OEC 13

FOOTNOTES FOR TABLE 2-A AND SUBSEQUENT TABLES

1. Data derived from a stratified random sample of school districts was extrapolated to provide information for entire state

2. Foreign language enrollment includes 5,137 enrollments, language unspecified. Breakdown of information was available only by course level

3. Foreign language enrollment includes 377 enrollments, language unspecified

4. Total foreign language enrollment represents grades 9-12 enrollments only; no information was available for grades 7-8

5. Total foreign language enrollment includes 611 enrollments, language unspecified and 8,932 junior high school enrollment with no breakdown by language available. Individual language tables do not incorporate junior high enrollment of 8,932 into totals

6. Figures are for 1977-78

7. Foreign language figure includes 2,299 enrollments, language unspecified

FOOTNOTES FOR TABLE 3-C

a. 1972 data

b. 1973 data

c. Information is available for grades 9-12 only

d. 7-8 grade enrollments are available only according to level and are therefore included in 9-12, Course I figures

e. Figure represents estimate based on average of region

I. No information by grade level, only by course level

iI. Figure does not include junior high shcool enrollment of 9,597

FOOTNOTES FOR TABLE 5-C

a. 1972 data

b. 1973 data

c. No information was available for grade 7-8

d. 708 enrollments are available only according to level and are therefore included in grades 9-12, Course I figure

e. Figure represents estimate based on average of region

I. No information was available by grade level, only by course level

II. Figure does not include junior high school enrollment of 9,597

FOOTNOTES FOR TABLE 7-C

a. 1972 data

b. 1973 data

c. No information was available for grades 7-8

d. 7-8 enrollments were available only according to level and were therefore included in 9-12, Course I figures

e. Figure represents estimates based on average of region

I. Information was not available for grades 7-8
